LOW WEIGHT AND COMPACT DESIGN

FireSafe Vertical is the lightest filing cabinet on the market. Low weight and compact design makes it easy to transport and install. It is produced with an anti-tilt protection, so one drawer only can be opened at a time.

Cabinets with two drawers use minimal space and can be placed under a desk. FireSafe Vertical 2 – 21/60 weights 77 kilos only. The safe can be ordered with wheels, making it easy to move.

Handles in a smart design and a unique system for labelling each drawer gives a perfect retrieval system. The cabinet is delivered in colour RAL 9002, off-white. The colour can be changed according to customer requests.

FITTINGS

The cabinet is prepared for suspended files with magnifying glass label system, but can also be used for A4 briefcases-/ring binders. The most common briefcases fit perfectly into the drawer. FireSafe Vertical 21 can be used for A4 size. All other models can be used for A4 as well as folio size.

The cabinet can be ordered with a data media insert box and additional fittings, such as adjustable side mounted tip plates for supporting ring binders.

FireSafe Vertical can be delivered in 3 sizes in depth: 21, 25 and 31 inches. The deepest cabinet – FireSafe Vertical 31 – can be delivered with two, tree or four drawers. All other cabinets can be delivered with two or four drawers only.

APPROVED BY SP

FireSafe Vertical is tested and approved by SP (Swedish National Testing and Research Institute) according to the Scandinavian standard NT Fire 017 in Fire class 60P respectively 120P. The cabinet is in other words fireproof for paper and documents in minimum 60 respectively 120 minutes. In case of fire all closed drawer are fire protected even if one drawer is open.

CENTRALLOCK

The cabinet is always delivered with a central locking system – a key lock, locking all drawers. The cabinet can also be delivered with a key lock on each drawer or additionally with an extra electronic code lock or an access control system.
