DESCRIPTION

The Mega Cable Lock has been designed to provide additional security for valuable goods in transport.

The Mega Cable Lock is mainly used for shipping containers and trucks but the flexible design makes it suitable for most applications that would otherwise require two strong seals to be secured.

The seal provides the security of 2 cable barrier seals in one. One Mega Cable Lock seals the latch AND the bars on containers and trucks. Unlike normal cable seals, the Mega Cable Lock must be cut twice to be removed.

With the Mega Cable Lock in its proper place, the doors of a container or truck cannot be opened without cutting both parts of the Mega Cable Lock or removing both doors at the

MEGA CABLE LOCK

same time.

DOUBLE SECURITY BARRIER SEAL

- 1] Self-locking mechanisms are easily locked by hand.
- 2] The Mega Cable Lock can only be removed by two cuts with a strong cable cutter.
- 3] Two rust proof aluminium bodies with embedded locking mechanisms and a strong steel cable provide high barrier security for trucks and containers.
- 4] The Mega Cable Locks are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 5] The Mega Cable Lock is marked with serial numbers, logo, bar code and/or customer name. The seal's two locking bodies can be etched with identical information or according to customer requirements.

PRODUCT	MATERIAL	LOCKING LENGTH	CABLE DIMENSIONS	PULL STRENGTH	MARKING AREA	MARKING DIGITS
MEGA CABLE LOCK 250	ALUMINIUM BODY, MILD STEEL WIRE	125.0 CM OR CUSTOMISED	Ø 2.4 MM	+550 KG	2.0 X 2.0 CM	MAX 10
