

FAST SEAL

THE PP / NYLON DIFFERENCE

The Fast Seal is a relatively strong seal despite its small dimensions. This is partly due to the metal locking mechanism, which secures the seal.

The Fast Seals are available in either Polypropylene (PP) or Nylon. The characteristics of Nylon make the seals twice as strong as the PP seals.

The Fast Seals are easy to use for all applications with small sealing facilities e.g. cassettes for ATM machines and money boxes on which the Fast Seals are widely utilised.

VERSATILE SEAL WITH METAL LOCKING

- 1] The Fast Seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 2] Ultrasonic welding technology is used to permanently fix the cap to the Fast Seal. Ultrasonic welding is too strong to be cut or forced open without leaving clear evidence of tampering.
- 3] Metal clip locking provides greater pull strength to the thin and flexible strap.
- 4] Durable Nylon or PP securing strap gives the user a choice of strength to match different applications.
- 5] Colour coding is made possible by using combinations of whitebased seals and multi-coloured caps.
- 6] The Fast Seals are supplied in mats of ten for ease of handling and control.
- 7] A floating metal clip is securely shielded by an ultrasonically welded cap, providing great locking strength and security.

PRODUCT	MATERIAL	LOCKING LENGTH	STRAP DIAMETER	PULL STRENGTH	MARKING AREA	MARKING DIGITS
FAST SEAL 5"	POLYPROPYLENE	11 CM	Ø 2.3 MM	13 KG	FLAP: 1.3 X 1.8 CM	MAX 8
	NYLON	11 CM	Ø 2.3 MM	19 KG	FLAP: 1.3 X 1.8 CM	MAX 8
FAST SEAL 8"/10"/12"	POLYPROPYLENE	20 CM / 25 CM / 30 CM	Ø 2.3 MM	15 KG	FLAP: 1.3 X 2.5 CM	MAX 9
	NYLON	20 CM / 25 CM / 30 CM	Ø 2.3 MM	25 KG	FLAP: 1.3 X 2.5 CM	MAX 9
