

A FLEXIBLE SECURITY SEAL

It is applicable to most locking scenarios and is versatile enough to make the seal an effective tagging seal for transporters and retailers.

Standard markings on the Mini Tight seal include serial number, customer name/ logo. A variation of bar codes can also be etched on with laser technology.

The Mini Tight seal is an ideal security seal for all tagging and quick-locking requirements. The seal's thin and flexible strap is perfect for light security applications such as tagging of clothes, plants, fire extinguishers and cable-tie replacements.

ECONOMICAL TAGGING SEAL

- 1] The Mini Tight Seal is etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 2] The seal can be removed without a tool. It snaps off when twisted by hand.
- 3] This low-cost one piece moulded seal is great for tagging purposes.
- 4] The slim 3 mm diameter tail makes this seal easy to apply to almost all small applications.
- 5] Enlarged ring on the end of the tail prevents reverse locking.

PRODUCT	MATERIAL	LOCKING LENGTH	STRAP DIMENSIONS	PULL STRENGTH	MARKING AREA	MARKING DIGITS
