

**INSIDE THE LOCKING CHAMBER**

The strap can still move slightly when the Domino is sealed, enabling inspectors to detect glueing easily. The Inspection Window is an optional feature, which enables quick and easy visual inspection of the locking mechanism - a unique feature developed by MegaFortris. Other seals are less tamper evident because the locking mechanism cannot be visually inspected.

Standard markings can include serial number, customer name/ logo. A variation of bar codes can also be etched on with laser technology.

Typical applications include trucks and tankers, customs control, airline cargo, empty shipping containers, rail wagons and warehouses.

**DOMINO**

**UNIQUELY TAMPER-EVIDENT STRAP SEAL**

- 1] Colour coding through different coloured caps and base of seals.
- 2] Domino seals are etched with permanent laser marking. Laser marking offers the highest level of security as it cannot be removed and replaced.
- 3] The Domino is the only metal strap seal that has the marking etched on a corrosion proof plastic surface. The marking therefore stays clear and legible even after long-term applications.
- 4] Ultrasonic welding technology is deployed to permanently bond caps and seals. Ultrasonic welding is too strong to be cut or forced open without leaving clear evidence.
- 5] Alignment holes ensure easy inspection of proper deployment.
- 6] The strong and durable metal strap can withstand harsh handling and the climatic elements in a long-haul shipment.
- 7] The metal strap is reinforced to enable stronger sealing.

PRODUCT	MATERIAL	LOCKING LENGTH	STRAP DIMENSIONS	PULL STRENGTH	MARKING AREA	MARKING DIGITS
